Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on location at 17:15. 68 degrees F, sunny, north/northwest wind 5-10 mph. Met with the company contact who led me to the release location. An area approximately 10 X 50 feet long on the east side of the well pad had caught fire and burnt some of the vegetation. No petroleum impacts were noted on the vegetation or soil off the well pad. Shorter undergrowth vegetation appeared healthy and of proper color. No further follow-up needed at this time.
